RE: **Construction Notice**
Starr Avenue Extension Waterline Improvement

Dear Resident:

The City of Oregon has awarded a contract to Hillabrand & Sons Construction, LLC, 5811 Woodville Road, Northwood, Ohio 43619 for the Starr Avenue Extension Waterline Improvement Project. Construction on the project is currently scheduled to begin Monday, March 23, 2020, weather permitting, and is anticipated to be completed by August.

The project improvements will consist of replacing approximately 5,300 feet of 8-inch waterline on the south side of Starr Avenue Extension between Wynn and Stadium Roads. The existing water service connections along Starr Avenue Extension will be connected to the new 8-inch waterline.

During working hours the contractor may close Starr Avenue Extension between Wynn Road and Stadium Road to through traffic and maintain one lane of traffic through the work area for local. Due to the nature of the project, we ask that you avoid driving through the construction operation area as much as possible.

Access to driveways along the south side of Starr Avenue Extension within the project work limits will be temporarily interrupted during some stages of the construction operation. **The city and/or contractor will be notifying property owners directly if access to their driveway will be affected by the scheduled work.** The contractor will be required to keep any necessary driveway closures to an absolute minimum. Driveways will be open during non-working hours unless otherwise notified. Emergency access to drives will be available at all times.

The contractor will be contacting the Ohio Underground Protection Agency (OUPS) prior to digging to have underground utilities marked. The public utility companies will be marking their utilities as best as possible. Please contact the city to note any underground sprinklers systems, drainage tiles, or buried utilities that may not be marked or marked improperly.

The City has also hired Quality Control Inspection, Inc. (QCI) to provide full-time inspection for this project. The QCI project inspector, George Flanagan, will be available on site to address any concerns you may have during construction.

For all concerns, questions or problems regarding the construction operation, the following are the project construction contact numbers:

City of Oregon Department of Public Service (419) 698-7047
Oregon Police Dispatch (any after-hours non-emergency matters) (419) 698-7064

Construction plans and specifications for the project are available for review at the City of Oregon Municipal Complex at the Department of Public Service Office.

If you have any concerns or questions regarding this project, please contact the Department of Public Service at (419) 698-7047. Your cooperation with this project is greatly appreciated.

Sincerely,

Paul Roman, P.E.
Director of Public Service
