

CITY OF OREGON
DEPARTMENT OF PUBLIC SERVICE
July 6, 2022

TO: Brandon Begin, Chief of Police

FROM: Paul Roman, Director of Public Service

SUBJECT: **Coy Road Closure** (North and South of Navarre Avenue)
Navarre Avenue Lane Restrictions (1-lane in each direction through Coy Rd Intersection)

Beginning **Monday, July 18, 2022**, it shall be necessary to completely **close Coy Road at Navarre Avenue** to all traffic and **reduce Navarre Avenue to one lane of traffic in each direction through the Coy Road Intersection**. The road and lane closures are necessary to permit Columbia Gas to replace an existing gas line on Navarre Avenue in the vicinity of Coy Road.

Also beginning **Monday, July 18, 2022** through **approximately Friday, November 18, 2022**, Navarre Avenue and Coy Road motorists can expect to experience possible lane closures in the area of the Navarre Avenue and Coy Road Intersection, with possible delays, especially during peak hours. The lane closures are necessary to permit the E.S. Wagner Company to construct additional lanes, install medians / U-turn lanes, upgrade traffic signals, replace existing Coy Road Bridge over Amolsch Ditch and install various other improvements as part of the Navarre/Coy Intersection Safety Improvements Project (LUC-2-22.51, PID 109596).

Unless notified otherwise, the entrance drives to properties within the closure area will remain open throughout the closure period.

The signed detour route for **Coy Road traffic south of Navarre Ave.** will be Brown Rd and Wheeling Street.

The closure of **Coy Road south of Navarre Avenue** is expected to be opened by **Friday, September 16, 2022**.

The signed detour route for **Coy Road traffic north of Navarre Avenue** will be Starr Avenue and Wheeling Street.

The closure of **Coy Road north of Navarre Avenue** is expected to be opened by **Friday, October 7, 2022**, which includes the replacement of the existing bridge over Amolsch Ditch.

This special traffic regulation above noted is hereby approved as an emergency and temporary measure by authority of the Oregon Municipal Code. Anyone having any questions or comments regarding the above closure should contact the Director of Public Service office at (419) 698-7047.

Paul Roman, P.E.
